

Hints—INT182 Projects

1)Data Science track:

Image source: GeeksForGeeks.com

Goal: Complete a DS pipeline of 3 phases by yourself of

- i) Data exploration
 - ii) 1st round of models
 - iii) 2nd round of models (need to see improvement from previous phase).
- *(DO NOT turn in other people's python notebooks)

Example projects:

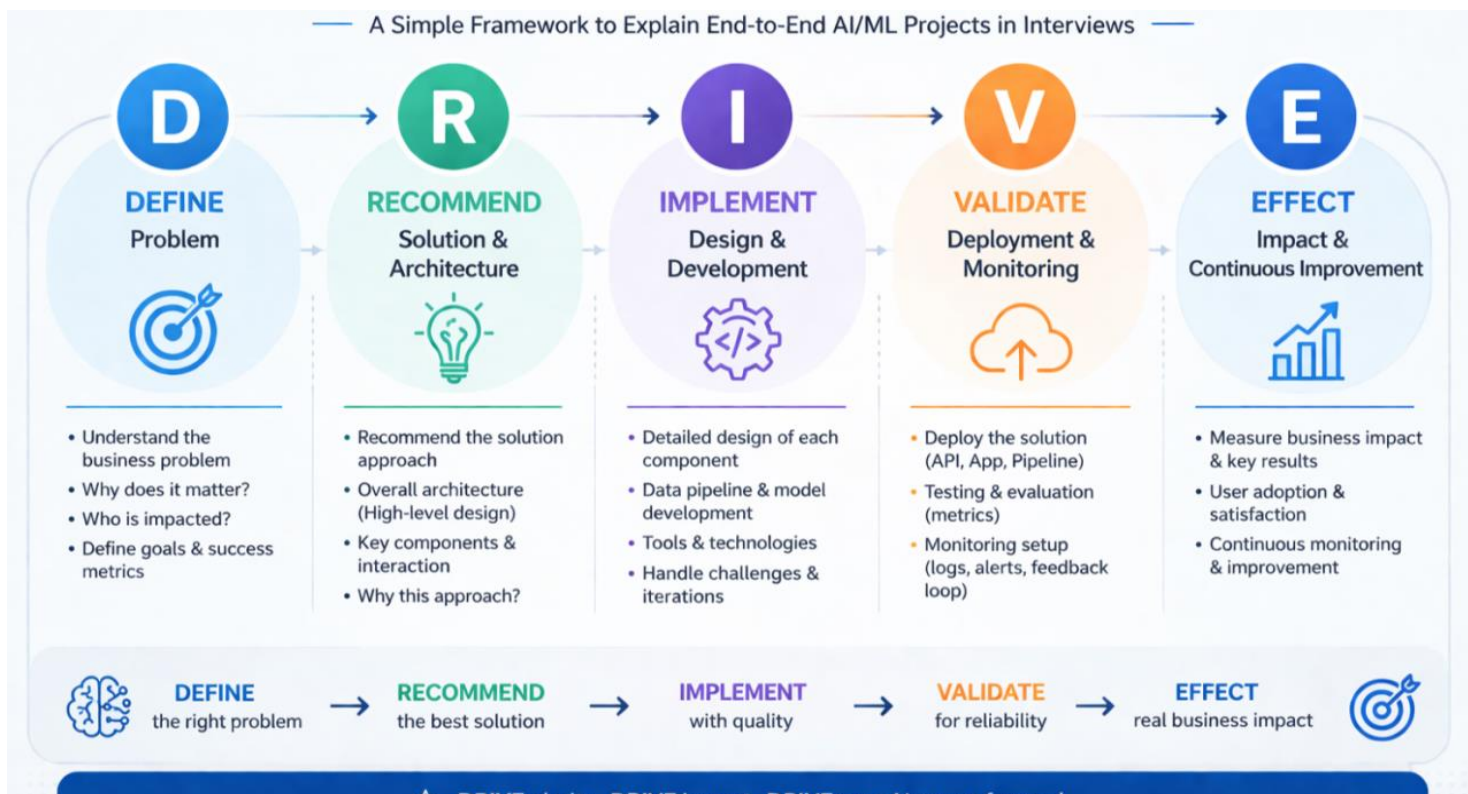

On www.kaggle.com (*comes with free real-time model grading ...)

- Titanic Survival Prediction classification task

- House Price Prediction regression

2)AI track:

Image source: <https://share.google/KAvYXT0ukZzwHhrif>

Goal: Complete an AI solution pipeline (* not require the need to create AI model yourself)

Example topics:-

AI **Technologies**:

- Text-to-Image/Video (MidJourney, Runway ML)
- AI for 3D Content Creation
- AI Agents & Autonomous Systems
- AI Personal Assistants (AutoGPT, Devin AI)
- Multi-Agent Systems & Swarm Intelligence
- AI in Gaming (NPCs, Procedural Content Generation)
- Edge AI & TinyML
- Robotics & Robotics simulator (RoboSpace)
- Re-enforcement learning
- Machine learning
- Generative AI & LLM
- Computer vision / Object detection (YOLO application)
- Body tracking (MediaPipe)

AI Applications Across Industries:

- Education AI (AI Game for learning)
- Healthcare AI (AI Game for aging adults)
- Disease Diagnosis (Radiology, Pathology AI)
- Drug Discovery (Generative Chemistry)
- Wearable AI for Health Monitoring
- Algorithmic Trading & Fraud Detection
- AI-Powered Customer Service (Chatbots, Voice AI)
- Predictive Analytics & Risk Management
